The Directors are pleased to present the Group's Interim Report and condensed financial statement for the six months ended 30 June 2007. The consolidated income statement, consolidated cash flow statement and consolidated statement of changes in equity of the Group for the six months ended 30 June 2007, and the consolidated balance sheet as at 30 June 2007 of the Group, all of which are unaudited and condensed, along with selected explanatory notes, supplementary financial information and supplementary information are set out on pages 6 to 60 of this report.

Hong Kong's economy remained buoyant in the first half of 2007, bolstering domestic consumption, foreign trade, employment rate and per capita income. Local stock market was driven up by excess liquidity in the capital market.

The spectre of sub-prime mortgage has further deepened the credit crisis in the United States recently. It is believed that the sub-prime mortgage problem will eventually abate and not seriously deter economic development. Hong Kong will continue to benefit from Mainland's rapidly expanding economy. However, inflationary pressure will intensify as salaries, rental levels and prices of imported goods continue to soar; and this coupled with more volatile market conditions make the operating environment of the banking sector even more challenging. The Bank will monitor market development closely and adjust business strategies timely in order to provide products and services that answer the needs of the customers.

Financial Review

Comparing the Bank's operating results for the first half of 2007 with the corresponding period of 2006:

Profit after taxation amounted to HK\$855,441,000, representing a decrease of 2.8%. In the first half of 2007, the Bank recorded a revaluation surplus on investment properties of HK\$162,880,000, a decrease of HK\$255,123,000 when compared with HK\$418,003,000 recorded in 2006 mid-year. When excluding the net gain on fair value adjustments on investment properties and the related deferred taxation, the profit after taxation increased by 34.7%, mainly attributable to the growth in net interest income and non-interest income, of which securities brokerage earnings growth was outstanding.

Net interest income was HK\$731,589,000, up 8.3% as compared with that in the same period last year. Due to severe competition, interest rate spreads narrowed with net interest margin dropping 4 basis points when compared with that of the same period last year.

Operating income from insurance business increased by 7.6% to HK\$206,546,000, and other operating income increased by 46.7% to HK\$378,916,000.

Total operating income improved by 17% to HK\$1,317,051,000. Operating expenses increased by 13% to HK\$349,929,000, mainly due to higher staffing and information technology related expenses.

The cost-to-income ratio dropped by 0.9% to 26.6%, compared with the first half of 2006. Operating profit before impairment allowances on loans and advances increased by 18.5% to HK\$967,122,000. Impairment allowances on loans and advances of HK\$11,563,000 were made. Charge for insurance claims went up by 19.5% to HK\$173,819,000.

營業溢利增加27.9%,為港幣781,740,000元。

平均總資產回報率為1.96%,去年同期為2.27%;平均股東資金回報率為14.8%,去年同期為16.94%。

二〇〇七年六月三十日之綜合資本充足 比率為15.2%,期內平均流動資金比率為 46.4%。

Operation Review

Deposits

Total deposits, including structured deposits, grew by 6.3% as compared with that at last year-end. The continuous influx of capital coupled with a buoyant stock market during the first half of 2007 caused a large number of small investors to park their funds in current accounts for investment purposes.

Benefiting from the continuous appreciation of Renminbi, the Bank's Renminbi deposits recorded an increase of 13.3% as compared with that at 2006 year-end. In June 2007, the Hong Kong Monetary Authority successfully introduced the issuance of Renminbi denominated bonds into Hong Kong's debt market. Renminbi denominated bonds will likely become a popular means of investment.

As at 30 June 2007, certificates of deposit totalling HK\$4,138,208,000 were issued, down 17.3% as compared with that at last year-end. An overwhelming majority of such issues are floating rate. For those fixed rate structured certificates of deposit, the interest rate risk involved is hedged by relevant derivatives.

Advances to customers

Total loans and advances to customers grew by 6.8% as compared with that at year-end 2006.

With unfailing effort, the volume of newly booked residential mortgages resumed growth in the second quarter of 2007. The Bank will launch various new loan products with the aim of further expanding loan business for better return in the second half of 2007.

Corporate loans performed satisfactorily and recorded an increase of 20.8% as compared with 2006 year-end, while syndicated loans achieved an 11.1% growth in the same period.

The operation of the Bank's hire-purchase and leasing subsidiary, Wing Lung Finance Limited, has become more stable in the first half of 2007 and recorded a slight increase in profit. It is hoped that the subsidiary will maintain growth in the second half of 2007.

外匯買賣及外幣找換整體收益較去年同期 上升8.6%。

各種高息貨幣對美元及其他低息貨幣的匯 價單向上升,外匯交投平淡,盈利減少。 本行會強化現貨交易組,期望下半年交易 量及盈利均可以提升。

另方面,會繼續作更多推廣活動,不斷完 善現有服務及產品,以增加其吸引力與競 爭力。

保險

永隆保險有限公司二○○七年上半年毛保費及承保盈餘均較去年同期下降,主要是在激烈競爭下保費下調及索償宗數增加所致;惟投資收益則有所增長。

保險部的代理業務及佣金收益均呈下跌, 至於代理人壽保險之淨佣金收益則較去年 同期增長13.1%。

Treasury

Combined income from foreign exchange and money exchange business gained by 8.6% from the level a year ago.

The one-sided rise in high-yielding currencies against US Dollar and other lower-yielding currencies posed an unfavourable environment for foreign exchange activities and income growth. The Bank will strengthen its foreign exchange spot trading team with the aim of boosting trading volume and income in the second half of 2007.

During the first half of 2007, money exchange income grew impressively as transaction volume increased and profit margin widened.

Wealth management

Wealth management business recorded an income growth of 38.6% when compared with last mid-year 2006.

Wealth management business expanded appreciably, capturing opportunities provided by the buoyant stock market with the Hang Seng Index and the Hang Seng China Enterprises Index both reaching record-high levels.

Futures commission income also recorded satisfactory growth.

In the second half of 2007, the Bank will further enhance the efficiency and capacity of the securities computer system to cope with business expansion. The Bank plans to expand its securities service network by setting up new securities service centres at branches with good business potential as well as expanding the existing ones to further improve its market share.

The Bank will continue to launch promotion campaigns and constantly enhance its service and products to draw in potential customers and improve the Bank's competitiveness.

Insurance

Wing Lung Insurance Company Limited recorded a decrease in both gross premium and underwriting profit as compared to that of the corresponding period last year, mainly attributable to lower premium under fierce competition and higher claims; however, income from investment increased satisfactorily.

The Insurance Department recorded a decline in agency business and commission income; while commission income from life insurance products increased by 13.1% over the corresponding period last year.

本行除了採取較靈活價格政策以應付競 爭、保持市場佔有率外,有須堅守穩健營 運原則,務求整體保險業務能獲得平衡而 持續發展。

分行

本年七月二十八日本行在沙田廣場增設了一間分行,連同原有的33間,現時在本地設有分行共34間。此外,在國內深圳市設有分行及支行各一間,在美國羅省及開曼群島各設有海外分行一間。上半年各分行均運作如常,業務和盈利表現平穩。

1 Basis of preparation and significant accounting policies

These unaudited consolidated condensed interim financial statements are prepared in accordance with Hong Kong Accounting Standard ("HKAS") 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and should be read in conjunction with the 2006 annual financial statements.

The accounting policies and methods of computation used in the preparation of these condensed interim financial statements are consistent with those adopted in the preparation of the Group's annual statutory financial statements for the year ended 31 December 2006.

The HKICPA has issued a number of new/revised Hong Kong Financial Reporting Standards ("HKFRSs", a collective term which includes all applicable individual Hong Kong Financial Reporting Standards, HKASs and Interpretations), which are effective for accounting periods beginning on or after 1 January 2007. The Group adopted the following new/revised HKFRSs which are relevant to its operations:

HKFRS 7

- Financial instruments: disclosures

HKAS 1 (Amendment)

- Presentation of financial statements: capital disclosures

The adoption of the above HKFRSs did not result in significant changes to the Group's accounting policies and did not have significant impact on the Group's results of operations and financial position.

In addition, the Hong Kong Monetary Authority (the "HKMA") has recommended additional disclosures under the Banking (Disclosure) Rules, which have been adopted in these condensed interim financial statements.

Up to the date of issue of these condensed interim financial statements, the HKICPA has also issued certain new/revised HKFRSs which are not yet effective for accounting period beginning on 1 January 2007 and have not been early adopted by the Group. The Group is in the process of making an assessment of what the impact of these new/revised HKFRSs is expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the Group's result of operations and financial position.

2 Basis of consolidation

These condensed interim financial statements cover the consolidated positions of the Bank and all its subsidiaries, unless otherwise stated, and include the attributable share of the results and reserves of its jointly controlled entities and associates. For regulatory reporting, the bases of consolidation are set out in notes 1, 2 and 6 of the supplementary financial information of these condensed interim financial statements.

The contractual amounts of these instruments indicate the volume of transactions outstanding as at the balance sheet date and they do not represent amounts at risks. The derivative instruments become favourable (assets) or unfavourable (liabilities) as a result of fluctuations in market interest rates, foreign exchange rates or equity prices relative to their terms. The aggregate fair values of derivative financial assets and liabilities can fluctuate significantly from time to time.

The credit risk-weighted amounts at 30 June 2007 were computed in accordance with the Banking (Capital) Rules issued by the HKMA, which became effective on 1 January 2007. The corresponding amounts at 31 December 2006 were calculated in accordance with the Third Schedule of the Hong Kong Banking Ordinance and guideline issued by the HKMA, the amounts calculated are dependent upon the status of the counterparty and the maturity characteristics of each type of contract.

Replacement cost is the cost of replacing all contracts which have a positive value when marked to market (should the counterparty default on its obligations) and is obtained by marking to market contracts with a positive value. Replacement cost is a close approximation of the credit risk for these contracts at the balance sheet date.

(一)資本充足比率及資本基礎(續)

本行於二〇〇七年六月三十日之資本 比率,乃按照香港金融管理局所發出 之《銀行業(資本)規則》(「資本規則」) 計算。此資本規則乃根據香港《銀行業 條例》第98A條而制定,並於二〇〇七 年一月一日生效。根據該資本規則, 本行選擇採納「標準方法」計算信貸風 險及市場風險之風險比重資產,以及 採用「基本指標方法」計算營運風險。

於二〇〇六年十二月三十一日之資本 比率,乃根據香港《銀行業條例》附表 三(「附表三」)計算。

於二〇〇七年六月三十日及二〇〇六年十二月三十一日,所計算資本比率之綜合基礎乃跟隨財務報表之綜合基礎,但撤除列於簡明中期財務報表內[註釋(三十二)]之若干附屬公司。因此,該等未綜合之附屬公司之投資成本會從資本基礎中扣除。

由於資本規則及附表三在綜合結算、 計算資本基礎及風險比重資產方面之 要求上有重大分別,因此資本比率不 能作直接比較。

1 Capital adequacy ratio and capital base (continued)

The capital ratios at 30 June 2007 were calculated in accordance with the Banking (Capital) Rules (the "Capital Rules") issued by the HKMA under section 98A of the Hong Kong Banking Ordinance, which became effective on 1 January 2007. In accordance with the Capital Rules, the Bank has adopted the "standardised approach" for the calculation of the risk-weighted assets for credit risk and market risk, and the "basic indicator approach" for the calculation of operational risk.

The capital ratios at 31 December 2006 were calculated in accordance with the Third Schedule (the "Third Schedule") of the Hong Kong Banking Ordinance.

The basis of consolidation for calculation of the capital ratios at 30 June 2007 and 31 December 2006 follows the basis of consolidation for financial reporting but excludes certain subsidiaries as set out in note 32 of these condensed interim financial statements. The investment costs of these subsidiaries are therefore deducted from capital.

As there are significant differences between the Capital Rules and the Third Schedule on requirements in the scope of consolidation and the calculation of capital base and the risk-weighted assets, the capital ratios are not directly comparable.

(七)金融風險管理

本集團已制定政策及程序,用以識別、量度、控制及監管信貸、流動資金、外匯、利率及市場風險。常務董事會就此等風險管理政策及程序之充分性及果效而作定期檢視;而稽核部門亦會進行定期稽核及檢查,以確保該等政策及程序得以被落實遵從。

甲、 使用金融工具之策略

就性質而言,本集團廣泛使用之金融 工具包括債務、股權及其他證券,以 及資產負債表以外之衍生工具。衍生 工具是一項合約,其價值是由合約內 指定之一種或多種金融工具或指數而 確定。該等工具主要包括外匯、利率及 股權之遠期、期貨、掉期及期權合約。

本集團以定息及浮息及不同年期接受 客戶存款,並將資金投放於高質素之 資產以賺取息差。在維持足夠流動資 金以應付所有可能到期的提取下,本 集團透過吸納短期資金並以較高息率 拆放較長年期的貸款以求提高息差。

本集團亦透過貸款予多個不同信貸級 別的商業及零售借款人以賺取息差。 此等營運不只牽涉資產負債表上之客 戶貸款,亦包括擔保及其他承擔如信 用證及保證書。

7 Financial risk management

The Group has established policies and procedures for the identification, measurement, control and monitoring of credit, liquidity, foreign exchange, interest rate and market risks. The adequacy and effectiveness of risk management policies and procedures are regularly reviewed by the Executive Committee of the Board of Directors (the "Executive Committee"). The Internal Audit Department also performs regular audits to ensure compliance with policies and procedures.

(a) Strategy in using financial instruments

By their nature, the Group's activities are principally related to the use of financial instruments which include debt, equity and other securities and certain off balance sheet derivatives. Derivatives are contracts whose value is derived from one or more underlying financial instruments or indices defined in the contract. They mainly include forwards, futures, swaps and options in foreign exchange, interest rate and equity contracts.

The Group accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn interest margins by investing these funds in high-quality assets. The Group seeks to increase these margins by consolidating short-term funds and lending for longer periods at high rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The Group also seeks to earn interest margins through lending to commercial and retail borrowers with a range of credit standings. Such exposures involve not just on-balance sheet loans and advances, but also guarantees and other commitments such as letters of credit, and other performance bonds.

The Group trades in financial instruments where it takes positions in traded and over-the-counter instruments, including derivatives, to take advantage of short-term market movements in equities and debt securities and in currencies and interest rates. The principal derivatives used by the Group are interest and foreign exchange rate related contracts, which are primarily over-the-counter derivatives. Most of the Group's derivative positions have been entered to meet customer demand and to hedge these and other trading positions. The Executive Committee places trading limits on the level of exposure that can be taken in relation to both overnight and intra-day market positions. With the exception of specific hedging arrangements, foreign exchange and interest rate exposures associated with these derivatives are normally offset by entering into counterbalancing positions, thereby controlling the variability in the net cash amounts required to liquidate market positions.

乙、信貸風險

本集團承擔著信貸風險,該風險乃 指交易對手於到期時未能償還全事 欠款。有關風險乃由於本集團從事信 貸、防告工具及其 他活動而引起。經濟上有重大轉變或 個別行業呈現衰退引致損失,與於結 算日已提之減值準備發生偏差,管理 層須小心處理有關因信貸而所帶來之 風險。

本集團之信貸政策確定授出信貸之標 準、信貸批核、審閱及監控程序、以 及貸款分類及撥備之系統。

本集團按審慎之基礎管理所有信貸風險,根據業務、財務、市場及行業狀況及抵押品資料,評估不同類別內強手之信貸風險值。本集團在合適的情況下須取得抵押品以減低風險。無論是否有抵押品作押,所有信貸均按客戶或交易對手之償還能力而作出決定。

若市場上有發展新產品之機會,一個 由高級管理層及有關業務經理組成之 委員會將負責檢討產品風險之評估及 計劃之推行,而該等檢討亦須受內部 稽核之檢查。所有新產品均須由常務 董事會核准。

為避免過於集中所引致之風險,各個客戶、交易對手及行業之信貸風險,各個客戶、交易對手及行業之信貸風所有信貸風險之限額由常務董事會核准,該會同時負責檢討及批核最大額度之援權授信審核委員會及其他信貸業務管理人員負責,實際信貸風險、稅投資產質素均由管理層定期監管及控制,並受內部稽核之審查。

任何單一借款人(包括銀行及其他金融機構)之信貸風險,已制定分級限額以限制資產負債表以內及以外之風險,及制定每日交易風險限額以限制持作買賣用途之項目如遠期外匯合約。而每日會將實際授信與限額對照,藉以監察風險水平。

7 Financial risk management (continued)

(b) Credit risk

The Group takes on exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due. It arises from the lending, trade finance, treasury, derivatives and other activities undertaken by the Group. Impairment allowances are made for losses that have been incurred at the balance sheet date. Significant changes in the economy, or in the health of a particular industry segment, could result in losses that are different from those provided for at the balance sheet date. Management therefore carefully manages its exposure to credit risk.

The Group's credit policy defines credit extension criteria, the credit approval, review and monitoring processes, and the system of loan classification and impairment allowance.

The Group manages all types of credit risk on a prudent basis by evaluating the creditworthiness of different types of counterparties based on an assessment of business, financial, market and industry sector and collateral information applicable to the types of credit extended. To mitigate the risk, the Group obtains collateral where appropriate. All credit decisions, whether or not secured by collateral, are based on counterparties' repayment capacity.

When a new product development opportunity is identified, a committee comprising the senior management and the business managers concerned is organised to review the product risk assessment and implementation plan, which are also subject to internal audit checking. All new products are required to be approved by the Executive Committee.

To avoid concentration risk, credit exposures to individual customers, counterparties and industry sectors are carefully managed and monitored by the use of limits. All credit risk limits are approved by the Executive Committee. The Executive Committee is also responsible for the review and approval of the largest credit exposures and portfolio management of risk concentrations. Approval authorities are delegated to the Group's Credit Committee and other lending officers. Actual credit exposures, limits and asset quality are regularly monitored and controlled by management and subject to checks by the internal audit function.

The exposure to any one borrower including banks and other financial institutions is further restricted by sub-limits covering on- and off-balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily.

乙、信貸風險(續)

本集團會提供信貸承諾,包括發出擔 保書及信用證。該等工具之主要目的 是確保資金足夠供應給客戶在有需要 時提取。該等工具乃不可撤回的保 證,表示本集團將會在客戶未能向第 三方履行責任時作出償付。該等工具 帶有與貸款相同之信貸風險。

承諾延長信貸乃代表以放款、擔保書及信用證等形式授權延長未使用險等形式授權延長未使用險。有關延長信貸承擔之信貸風險相同的潛在損失。由於大部份延承相長信軍人,因此,此等可能出不動,因此,此等可能出來的團會控制信貸承擔之期限,因長期承擔存在較大程度的信貸風險。

丙、 市場風險

本集團所承擔之市場風險乃指由於市場利率及價格(例如息率、匯率及股票產品之價格)變動所引致資產、負債及承擔上之損失。本集團之市場風險主要源自其外匯持倉及持作買賣用途之證券及衍生工具。所有此等持倉均受一般及特定之市場變更影響。

7 Financial risk management (continued)

(b) Credit risk (continued)

The Group further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions. Master netting arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Group's overall exposure to credit risk on derivative instruments subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

The Group has issued credit related commitments including guarantees and letters of credit. The primary purpose of these instruments is to ensure that funds are available to a customer as required. These instruments represent irrevocable assurances that the Group will make payments in the events that a customer cannot meet its obligations to third parties. These instruments carry the same credit risk as loans.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

(c) Market risk

The Group takes on exposure to market risk, which is the risk of loss in assets, liabilities and commitments arising from the net effect of changes in market rates and prices, such as interest rates, currency and equity products. The Group's market risk primarily arises from its positions in foreign exchange, securities and derivatives in its trading book. All these positions are exposed to general and specific market movements.

丙、市場風險(續)

本行及旗下數間附屬公司於截至二〇〇七年六月三十日止六個月內,從與市場風險有關活動所賺取之每日平均收入(包括與買賣有關之淨利息收入或其他收入)為港幣七十三萬三千元(二〇〇六年為港幣七十三萬二千元(二〇〇六年為港幣一百五十二萬二千元(二〇〇六年為港幣一百一十三萬四千元)。

7 Financial risk management (continued)

(c) Market risk (continued)

The Group's market risk exposures in different activities are managed by way of limits established by the Executive Committee. Exposures are measured and monitored on the basis of contractual or notional amounts, outstanding balances and stop-loss limits. All market risk trading positions are subject to daily mark-to-market valuation, monitored and managed by the Treasury Department. Independent monitoring, checking and trade confirmation are undertaken by a separate department independent of the Treasury Department. Regular checking and reviews are also conducted by the Group's internal audit function to ensure compliance with risk limits. All exceptions are reviewed and approved by the appropriate level of management and the Executive Committee. Actual positions are monitored by the Risk Management Committee.

The average daily revenue for the six months ended 30 June 2007 earned from market risk-related activities by the Bank and certain subsidiaries, including trading-related net interest income and other revenue was HK\$723,000 (2006: HK\$730,000). The standard deviation of this daily revenue was HK\$1,522,000 (2006: HK\$1,134,000).

丁、貨幣風險

現行市場外幣匯率的波動會影響本集 團的財務狀況和現金流量。本集團之 外匯風險主要包括財資部之外匯買賣 及源自商業銀行業務之貨幣兑換風 險。

常務董事會以貨幣及總額為基礎,制定隔夜及即日之持倉限額。此等風險每日均由財資部按常務董事會核定之外匯持倉限額集中管理,並由另一部門獨立監察。

由客戶交易而產生之外匯風險(包括 附設在某些客戶存款內之貨幣期權), 一般會與其他客戶交易或市場交易對 銷。用以購買港元資產之外匯資金均 會採用掉期或遠期貨幣兑換合約對沖 外匯風險。

戊、利率風險

現行市場利率的波動會影響本集團的公平價值利率風險及現金流量利率風險。公平價值利率風險乃指金融工具之價值將隨著市場利率改變而波動的風險。現金流量利率風險乃指金融工具之現金流量將隨著市場利率改變而波動的風險。

由於利率變動,息差可能會增加,但若利率出現不可預計的波動,則息差可能會減少或引致虧損。本集團已定有政策及制度以監察其較易受利率影響之倉盤及重定息率淨差距,以確保其在常務董事會所核定之限額以內獲妥善管理。實際持倉額會按月與核定限額作比較並由風險管理委員會監察。

儘管利率風險管理之主要目的在於限制利率變動對淨利息收入之潛在不利 影響,亦可在風險限額內增持利率倉 盤以提高收益。

7 Financial risk management (continued)

(d) Currency risk

The Group takes on exposure to effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Group's exposures mainly comprise foreign exchange dealing by the Treasury Department and currency exposures originated by its commercial banking businesses.

The Executive Committee sets limits on the level of exposure by currency and in total for both overnight and intra-day positions. All exposures are centrally managed by the Treasury Department and independently monitored by a separate department on a daily basis.

Foreign currency exposures arising from customer transactions, including currency options embedded in certain customer deposits, are normally offset against other customer transactions or transactions with the market. Foreign currency funding used to fund Hong Kong dollar assets is hedged using currency swaps or forward exchange contracts to mitigate the foreign exchange risk.

(e) Interest rate risk

The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow interest rate risks. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Interest margin may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Group has established policies and systems to monitor its interest-sensitive positions and net repricing gap to ensure that they are all properly managed under the limits approved by the Executive Committee. Actual positions are compared with the approved limits and monitored by the Risk Management Committee on a monthly basis.

While the primary objective of interest rate risk management is to limit potential adverse effects of interest rate movements on net interest income, interest rate positions may be taken for yield enhancement within the risk limits.

己、流動資金風險

流動資金風險乃指本集團未能以合理價格完成交易或達到融資需求而對盈利或資金形成之風險。本集團每天運用可動用的現金資源,以應付來自隔夜存款、活期賬戶、到期存款、貸款支取、與保證書的需求,以及來自保證金及其他現金結算衍生工具的需求。

本集團已定下政策及制度以監察各項 資產、負債及承擔之流動性,確保本 集團有能力應付所有到期債項。期內 本集團之平均流動資金比率遠高於法 定最低要求的百分之二十五。

本集團有制定流動資金比率、貸存比率及其他到期狀況之限額,以確保本集團有能力應付其資金需求。所有限額均由常務董事會核准。實際風險水平與核定限額之比較和監察,則由資產負債管理委員會執行。

本集團維持審慎水平的可變現流動資 產,以應付不可預計及龐大的現金需 求。亦定時為本集團所持流動資金情 況作壓力測試。

7 Financial risk management (continued)

(f) Liquidity risk

Liquidity risk is the risk to earnings or capital due to failure of the Group to meet its funding requirements or to execute a transaction at a reasonable price. The Group is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturity deposits, loan draw-downs and guarantees, and from margin and other calls on cash-settled derivatives.

The Group has established policies and systems to monitor the liquidity of its assets, liabilities and commitments and to ensure that the Group maintains an assured capacity to meet all obligations as they fall due. The Group's average liquidity ratio for the period was well above the statutory minimum of 25%.

Limits for liquidity ratio, loan-to-deposit ratio and other maturity positions have been set to ensure that the Group is able to meet its funding requirements. All limits are approved by the Executive Committee. Actual positions are compared with the approved limits and monitored by the Asset and Liability Management Committee.

A prudent level of realisable liquid assets is also maintained by the Group to meet unexpected and material cash requirements. Stress testing on the Group's liquidity position is regularly performed.
